

Combination Barley Twist

Designed for the Legacy™. These bits are designed to create traditional style barley twist profiles with diameters over 3".

As shown above, to create a 6" diameter barley twist profile, first start by using a 3" diameter rope moulding bit # 7586, to make a 2-start rope with 6" pitch. Next, plunge on the top of one of the rope heads to create a cove using the 3" Combination Barley Twist bit #7546. To attain the desired depth, 3-5 passes are required. When completed the final pass should match up with the edge of the bead on each of the sections of rope.

Legacy Pattern

Designed for the Legacy Ornamental Mill™, this bit allows you to follow a template when milling a contoured profile. It works on turnings up to 10" in diameter, square turnings up to 5" square or flat stock up to 5" thick. The router follows the template as you make approximately 1/4" deep cuts for 2 to 3 passes and then the bearing will follow the previous cut and support the router bit to eliminate chatter. It can also be used in a traditional router table like a pattern cutting router bit.
